CONNER LAURSEN

Technical Implementation & Operations Professional
Bothell, WA | (425) 319-2626 | connerlaursenk@gmail.com | LinkedIn | GitHub

SUMMARY

Customer-facing technical and operations professional with 5+ years of experience leading teams, improving processes, and resolving complex customer issues. Combines hands-on software development and data skills with experience translating user needs into practical solutions. Experienced explaining technical options to users and supporting projects through implementation. Graduate Certificate in Software Design & Development from the University of Washington.

CORE STRENGTHS

Requirements Discovery • Customer Implementation • Project Coordination • Process Improvement • Customer Training • Troubleshooting • Technical Communication • Documentation • Team Leadership • Data & Reporting

EXPERIENCE

Vehicle Handler | Oct 2026 - Present
DriveShop | Travel-based

- Support vehicle inspections, preparation, and logistics for automotive events on traveling assignments across the country.
- Help set up an autocross course, test its timing software, and explore importing participant data from Excel.

Moorage & Office Supervisor | Oct 2021 - Oct 2026
Port of Edmonds | Edmonds, WA

- Led customer-facing operations at a 900-slip marina, coordinating staff, records, agreements, waitlists, compliance, and complex customer issues.
- Translated operational requirements into improved workflows and reporting; used Excel and Power Query to clean, merge, and deduplicate CRM data and automate compliance reporting.
- Redesigned recurring reports on occupancy, vacancies, waitlists, guest use, staffing, and labor for leadership and operational planning.
- Supervised 3-10 employees, including hiring, onboarding, training, and coaching; helped increase marina occupancy to 100%, a five-year high, within the first year.

Front-End Developer (Freelance) | 2023-2024; 2026
The Celtic Sunflower | Eastside Consultants, Inc. | Palm Houses | Washington & California

- Partnered with small-business clients to gather requirements and turn feedback into websites with administrative features.
- Owned projects from requirements through launch and iteration, including client communication, testing, deployment, and source control.
- Built and deployed using React, Next.js, JavaScript/TypeScript, REST APIs, databases, Git, and GitHub.

TOOLS & TECHNICAL KNOWLEDGE

Data & Reporting: SQL, MySQL, MongoDB, SQLite, Excel, Power Query

Programming & Web: Java, JavaScript, TypeScript, C++, HTML, CSS, React, Next.js, Node.js, Express, REST APIs, client/server programming, TCP/IP fundamentals

Tools: Git, GitHub, Postman, Insomnia
